Commercial Product

Operationalizing the Human Element
A Force-Readiness Training Playbook and Reference Guide for AI-Integrated Defense Workflows

465-page, 7 x 10 hardcover professional reference for personnel working in AI-enabled mission, analytical, training and decision environments. It translates AI adoption and governance concerns into practical human-performance guidance centered on trust, verification, cognitive workload, escalation and accountable human judgment.

Mission Fit for DoD Education & Training Organizations

AI Workforce Readiness Common baseline for personnel adapting to AI-enabled workflows and decision support.	Human-Machine Trust Calibrated reliance, verification discipline and reduced automation complacency.
Human-in-the-Loop Governance Escalation, decision authority, accountability and responsible human oversight.	Faculty & Leader Development Supports instructor discussion, leader education and AI-integrated curriculum development.

Best-Fit Buyers & Use Cases

Professional Military Education & Leader Development	Cohort reference for AI literacy, responsible use, human judgment and leader development.
Defense Acquisition Workforce Education	Human oversight and accountability in AI-supported acquisition workflows.
Mission, Data, Digital & AI Training Programs	Cross-functional reference for operational teams integrating AI into mission and analytical workflows.
Faculty / Curriculum Development	Common reference supporting instructor preparation, facilitated discussion and curriculum design.

Purchase-Ready Commercial Offer

AVAILABILITY	Standardized published commercial product available now; organizational quantity requires no custom development.
DELIVERY	CONUS ground delivery included. Estimated fulfillment approximately 10-15 business days, subject to manufacturing capacity and carrier transit.
PAYMENT	Government Purchase Card accepted; federal EFT capability available.
